

Valdosta, Georgia

August 31, 1961

Chancellor Harmon W. Caldwell
University System of Georgia
244 Washington Street, S. W.
Atlanta 3, Georgia

Dear Chancellor Caldwell:

I wish to submit herewith the annual report of the Valdosta State College for the fiscal year ending June 30, 1961.

FACULTY

The past year has been a very satisfactory one for us here at Valdosta State College. Last year there was a great deal of worry and tenseness among our faculty over the integration situation. However, the fact that the Federal Courts admitted negroes to the University of Georgia seems to have settled, for a time anyway, the integration issue. Our faculty has settled down and we have not had the uncertainty and tenseness during the past year that was obvious among the faculty a year ago. I believe, in the thirteen years of my administration as President of the college that we have not had as satisfactory a year as we had during the year just ending.

We had no deaths in the faculty during the past year. We did have several new members of the official family of the college, however. Miss Fredeva Ogletree joined our faculty this year as Associate Professor of History and Dean of Women to replace Mrs. Mary Alice Wisenbaker who served in these capacities several years. Mrs. Wisenbaker reached the required retirement age and became Dean of Women Emeritus at the close of the last fiscal year. Miss Ogletree has done a very fine job for us, both as Dean

of Women and as a member of our History Department.

Mr. David Lewis joined our faculty in the fall as Assistant Professor of Economics and Business Administration, succeeding Mr. Robinson who was not re-appointed. Mr. Lewis came to us from the faculty of the University of Tennessee and has been a very valuable member of our faculty.

Late last summer, Mr. Don V. Erickson, Director of Public Relations resigned and was replaced by Mr. Harold Gulliver, Jr. as Director of Public Relations and Assistant Professor of German. Mr. Gulliver has done a very fine job in both categories. We did well to add him to our staff.

Mrs. Larry Veatch joined us last September as Part-Time Instructor in Physical Education for Women. Mrs. Veatch has been an excellent addition to our faculty, coming to us from Ward-Belmont College and with extensive experience in high school.

Mrs. L. J. Harrell joined the college staff as House Director in Converse Hall. She has been very successful in her work, coming to us from the University of Georgia where she had served as House Director for one of the Sororities.

Mr. Lavan Robinson joined our faculty in September as Associate Professor of Music to replace Mr. Claton Logan who resigned to go into religious work. Mr. Robinson holds the bachelor's and master's degrees from Louisiana State University and came to our faculty from Susquehanna University, where he had been a member of the staff for thirteen years. Mr. Robinson has been a very fine addition to the college faculty and we are very pleased that he is staying with us.

During the academic year Mr. D. E. Gerlock, Acting Head of the Department of Education was on leave and attended the Florida State University. During the year Mr. Gerlock has completed all the work for the

doctor's degree except his dissertation. His dissertation subject has been chosen and he is now working on that part of his advanced work. He will return to the faculty of the college at the opening of school in September.

With the opening of school last September, Mr. Spencer Jarnagin, Assistant Professor of Education returned from a two years leave of absence spent doing graduate work in Psychology at Florida State University, and again took up his work in the Education and Psychology Department. He served as Head of that Department in the absence of Mr. Gerlock.

Mr. Marvin Evans, Assistant Professor of English also on leave last year, returned to his position at the beginning of school last September and as usual did his customarily fine job of teaching Freshman and Sophomore English.

Mr. Edward Beard, Assistant Professor of Sociology was not recommended for re-appointment. His work had not been satisfactory and his health had been extremely poor, and he is being replaced by Mr. Augustus I. Riedel who will join our faculty as Associate Professor of Sociology this fall. Mr. Riedel comes to us from Lynchburg College with a very fine record of successful teaching in the field of Sociology and Social Work. When Mr. Beard became ill at the beginning of the summer, we prevailed upon Mr. Riedel to come on to Valdosta and teach in our summer session; which he did do with distinct success.

We lost Mrs. Barbara Hutchinson, temporary Assistant Professor of Education and Psychology. Mrs. Hutchinson had served on our staff for three years, replacing Mr. Spencer Jarnagin for two years and Mr. Gerlock for one year while they were on leave doing graduate work at Florida State University. Mrs. Hutchinson was a very competent instructor and we would liked to have kept her, but we simply did not have a place for her in our present setup.

Mrs. Hutchinson has left Valdosta to take a position on the faculty of Oklahoma University.

Although Mr. Gerlock was on leave doing graduate work and Mr. Evans is continuing work on his dissertation, as is Professor Gabard of our History Department, no staff member at the college received any advanced degrees during the past year.

At the close of the academic year, Dr. Harold S. Gulliver, Sr. who had served as Head of the English Department here at Valdosta State College since 1929, reached retirement age and became Professor Emeritus of English. Dr. Gulliver has received a Fulbright Lectorship and is in Damascus, Syria to teach during the next academic year, under the Fulbright Program.

Dr. Sapelo Treanor who has been a member of the faculty since 1931 and has served as Head of the Language Department, reached retirement age and became Professor Emeritus of Modern Languages.

Miss Lillian Patterson who has served as Librarian at the college since 1931 asked to be retired on account of ill health as of August 1st, 1961. Miss Patterson has been in very poor health for the past three years and on the recommendation of her doctor; she retired as of August 1st.

Mrs. J. A. Sconyers who has been House Director in Reade Hall since 1953 went on Retired Status at the end of the academic year.

All of these staff members have given very valuable service to the college in the many years that they have worked with us. Our good wishes go to them as they leave the campus.

To replace Dr. Harold Gulliver we have Dr. Arthur Gignilliat, recently Assistant to the Chancellor of the University System, coming in to Head our

English Department.

To replace Dr. Sapelo Treanor we have Dr. Robert Owens who comes to us from Mobile, Alabama with many years of outstanding service in the field of Modern Language Teaching. He has had considerable experience in teaching as well as Public Relations work in Industry, dealing with Latin America.

To replace Miss Lillian Patterson, we have recommended the promotion of Miss Thera Hambrick from Assistant Librarian to Librarian, and we are adding on a one year appointment to the Library, Miss Louise Barton who comes to us from Texas.

Since Valdosta State College is primarily a teaching institution on the undergraduate level, our faculty does not produce many research papers. However, during the past year Professor Maurice Lindsauer, Associate Professor of Chemistry published one paper "A Simple Isoteniscope and an Improved Method of Vapor Pressure Measurement" which was published in the Journal of Chemical Education, Vol. 37.

During the summer session of 1960 we had eleven faculty members who taught a full load of ten hours and ten faculty members carrying a load of five hours. The Dean of Women taught five hours, the President taught five hours, the Dean of Men taught five hours and the Academic Dean taught five hours.

During the academic year 1960-61 the President of the college taught one course each of the three regular quarters. The Academic Dean, the Comptroller and the Dean of Women each taught one-third of the time, Mrs. Larry Veatch taught two-thirds time in Physical Education. Mrs. Lee Bennett,

Instructor in Art also carried a two-thirds load. Mr. Saunders Garwood carried five courses during the academic year in the History Department; and Mrs. Beth McRae carried equivalent of ten hours during the academic year. In addition there were thirty-one full time faculty members teaching on the staff during the past year.

During the regular session we had six full professors, at an average salary of \$6,661.; twelve associate professors with an average salary of \$5,967. and thirteen assistant professors at an average salary of \$5,069. The average salary for faculty members of all ranks for the past academic year was \$5,732.

The following tables present the quarter-hour load and the student load of various staff members during the summer of 1960 and during the regular academic year, 1960-1961:

- TABLE I. Quarter-Hour Teaching Load, Summer 1960
- TABLE II. Student Load by Professors, Summer 1960
- TABLE III. Quarter-Hour Teaching Load, Regular Session 1960-1961
- TABLE IV. Student Load, Regular Session 1960-1961

Two-Year Secretarial Science Certificates

June 1961

5

I would like to take this occasion to commend our faculty for the very fine job they did during the past academic year. The departure of Mr. Douglas Robinson from our faculty and the addition of Mr. David Lewis as Assistant Professor of Economics and Business corrected one weak point in our faculty. The division of Business Administration did a very fine job last year. Mr. Shealy McCoy, the Chairman of the Division of Business Administration and Secretarial Science has done a very fine job of co-ordinating the work of the Department of Accounting, Business Administration and Secretarial Science. This department did an outstanding job last year and the graduates from those programs were able to find employment without difficulty.

The other weak spot in our faculty was Professor Edward Beard, Professor of Sociology. The addition of Mr. Augustus Riedel will correct that weakness in our faculty. All departments in the college did very fine work last year, and I do not believe there is a stronger faculty in the University System than we have at Valdosta State College. It would be difficult to single out any one department for commendation, as we do not have any departments that we have to apologize for.

I would like to comment particularly on the work of our Biology Department. Dr. Nevins, Dr. Carter and Dr. Connell all did outstanding work during the year and our Chemistry Department, likewise, did very fine work. I would like to also comment particularly on Professor Maurice Lindauer. Mr. Lindauer received a grant from the National Science Foundation for study at Vanderbilt University in the summer of 1960, and another grant from the National Science Foundation and Atomic Energy Commission to do research at the University of Tennessee during the summer of 1961.

During the academic year, Professor Lindauer taught a course in the techniques of radioisotopes. Such favorable comments were made concerning this course that we received an additional grant of money from the Atomic Energy Commission for additional laboratory equipment to be used in this field of study for our Chemistry and Physics Departments. As a result of his outstanding work in this field, Mr. Lindauer has been given a National Science Foundation grant for a year's graduate work at Harvard University, and will be on leave for the coming year.

It has been a very fine year as far as academic work at the college is concerned and I am very proud of the work that every member of our faculty has done.

STUDENTS

Our enrollment has continued to increase and the college has the largest enrollment in its history during the past academic year. As the scores on the college board tests were raised last summer, I believe that the students that we admitted last September were somewhat better prepared than those of previous years. This improvement in background has shown up in their work during the academic year. The morale of the student body, like that of the faculty, has been much better this year as we seemed to have passed the problem of integration.

The student activities program was successful during the past year, with high student interest in all aspects of the activities program. The college newspaper was better this past year than it has been for some time and I think this has been due to a great extent to the competent leadership of Mr. Harold Gulliver, Jr. who has had considerable newspaper experience.

In Table V which gives total cumulative enrollment for the year (each person enrolled counted only once) duplicates are excluded. A person enrolled in a Saturday class at one period of the year, and enrolled as a regular student another quarter, is shown only in the regular-student tabulation. Three Saturday classes were offered during the first half of the year, and three during the second. In these classes there were 154 individual enrollments, by a total of 118 students. Eight of these 118 were enrolled as regular students at other periods of the year; thus, the total of Saturday students is shown as 110. Cumulative enrollment of regular students was 820, and the total for the year -- each name counted once -- is 930.

In checking on the sizes of classes during the past year for this report, I have checked the report sheets in the Registrars' office by course numbers. This carries the number of students in a course and the grade they received in the course. When a student registers for a certain subject, that subject carries a course number, however, this particular type of check does not give the completely accurate picture as I shall explain. During the year just passed, we had 54 classes under 10; we had 97 classes in the next group from 10 to 20, with an enrollment in practically all of these approaching 20. We had 100 classes from 20 to 30; 40 classes from 30 to 40, and 43 classes over 40 and some of these were exceptionally large classes. In the first category of 54, with less than 10 enrollment, I would like to explain that in many cases Mr. Pember in the Art Department would have four different course numbers in one group, all of the students doing work in painting but at different stages of advancement. In other words, he might have had four classes as far as class numbers were concerned going on at the same time. In the group he would have had from 15 to 20 students, but it represented four different classes working at the same time.

In the Chemistry there were several small classes in analytical chemistry, but these were working in a laboratory when another course was doing its laboratory work. In other words, the instructor was carrying a laboratory in one course and a research course for a small number of students at the same time. A similar situation existed in the Education Department in some of the methods courses. The records in the Registrars' office would show a small enrollment in methods in Junior High, but the course was taught in workshop style, and Elementary methods and Junior High methods were done at the same time. In other words, to get a realistic picture of the actual number of classes under 10, we should subtract from the number of 54, 22

classes were taken care of in the manner mentioned above. Some of our advanced courses in Biology showed small numbers on the report sheet from the Registrars' office but the size of these classes are controlled by the number of laboratory spaces we have in the laboratory. We are adding an additional biological laboratory this summer so that we may correct the small classes in this department.

The case of Dr. Treanor is a little different. We have had one or two occasions when she taught a class of advanced Spanish or French for two or three students in addition to her regular load of work.

Our advanced Physics classes last year showed small enrollment but with the excellent facilities that we now have with the new wing and additional laboratory equipment, we should rapidly get over this problem of small classes in the Physics Department.

I have been very careful to keep accurate check on the small classes and cancel them wherever possible. Small classes have been taken care of, however, in the manner listed in this paragraph.

Checking on the scholarship record of students falls in the area of the Academic Dean, Dr. J. A. Durrenberger. I would like to quote briefly from his annual report:

"As stated in previous annual reports, the Academic Dean takes pride in the reputation Valdosta State College has built up for good, sound academic standards. He insists on quality instruction and strict grading standards on the part of the faculty, and integrity on the part of the students. A quarterly analysis of grades is made and distributed to all teachers. Also, quarterly reports are made on probations, exclusions, and the Dean's List. A summary of these reports for 1960-61 is shown in the following table:

Quarter	Total Enrolled	Number on Probation	Excluded	Lifted Probation	Dean's List
Fall	709	85	37	29	79
Winter	695	138	30	41	75
Spring	650	121	50	38	63

While the number of exclusions may appear to be high, the Dean has taken an indulgent attitude toward rule five of the Minimum Scholarship Standards which permits students dismissed for defective scholarship to re-register after an absence of one academic quarter, and of rule eight which allows excluded students to make up deficiencies in the summer quarter. More than half of those excluded at the end of the spring quarter are now enrolled in the summer session."

I have already mentioned briefly the extracurricular program of the college. This program, including the social activities are supervised jointly by the Dean of Men and the Dean of Women, with most of the details of these activities being carried out by the Student Government Association. As far as the fraternities are concerned, the Dean of Men supervises these and the Dean of Women is the supervisor of the sororities. Both Deans have given excellent supervision to the extracurricular program this past year.

Our intercollegiate athletic program is under the direction of Mr. Gary Colson who is Director of Athletics. Mr. Colson and Mr. Grant both members of the Physical Education Department, coached the various teams that participate in intercollegiate athletics. We are members of the Georgia Intercollegiate Athletic Conference, made up of the smaller schools in the

State. Our intercollegiate teams had a successful year this year, with our basketball team coached by Mr. Colson, being the top team in the conference. Mr. Colson's tennis team also lead the conference this year. The baseball team which is coached by Mr. William Grant had a very satisfactory season, winning about half of their games. It was necessary to start from scratch this year as practically all of the preceding team had graduated. We should have a much better year in baseball this coming year.

The girls in the college have an intramural program of athletics which was directed and supervised by Mrs. Larry Veatch, a member of the Physical Education Department. For the boys who do not participate in intercollegiate athletics, Mr. Grant directed a very successful intramural program. I do not believe that we could have two finer young men than Mr. Colson and Mr. Grant to work with our boys in the field of athletics.

Again I would like to state that the morale of the student body was much better this year than it was last year. Again I would point out that I think the uncertainty of the integration question had a great deal to do with the upset attitude of our students.

Conditions in the men's dormitory have improved somewhat this year, and we have not had quite as much trouble with excessive noise as we have had in previous years. I think the fact that we are getting a better grade of students will continue to improve this situation. The increase cutting score on the College Board for this coming year has enabled us to keep out many questionable, border-line students in which the play-boys usually fall.

Behavior among the boys has been very satisfactory this year. The Dean of Men, however, dismissed three students at the end of the fall

quarter for repeated violations of conduct regulations in Reade Hall. Another student was dismissed during the winter quarter for selling whiskey on the campus. Three men students were placed on conduct probation for the school year for excessive rowdiness. The Sigma Phi Epsilon Fraternity was placed on Social Probation for two quarters for not abiding by regulations of the college concerning chaperones for social events. All in all, it has been a very satisfactory year in our dealings with the men students.

Miss Fredeva Ogletree joined us as Dean of Women this past September and has been a very fine addition to our faculty. She had a very good year this past year working with the girls, and the Student Government Council in the dormitories operated very efficiently in dealing with minor infractions of dormitory regulations. The general conduct of the girls has been excellent this year and disciplinary action was taken against two girls during the year. These two girls were dismissed from school by the Dean of Women because of conduct not consistent with V.S.C. standards.

I would like to comment on our two House Directors, Mrs. Quillian in Ashley Hall and Mrs. Harrell in Converse Hall. Both of these staff members are ladies in every respect of the word and both have done very fine work with the girls in their dormitories during the past year. Both have been of invaluable assistance to the Dean of Women.

I would like to point out that the religious groups on the campus have been active this year. The Y.W.C.A. and the Young Men's Group has been equally active, and the Baptist Student Union located on Oak Street, just across the campus, has been a very valuable asset to the college. The Baptist Church maintains this building and carries on a

very fine program for the Baptist students and this program is directed by a full time worker, paid by the Georgia Baptist Convention. We have enjoyed working with the Director of the Baptist Student Union and we regretted to see him leave to take a Pastorate of a Baptist Church in South Georgia. A new director has been appointed for this activity. The Methodist young peoples group has been active this year as well as one or two other smaller groups affiliated with the other churches in the community. All in all, the work of the students has been very satisfactory this year as far as behavior is concerned and as far as scholarship is concerned. We are looking forward to an even better year next year.

We have been able to meet the demand of students for loans this year. We have not made every loan that was requested, but we have made those that were deserving and have been able to take care of the more deserving cases. Mrs. Maddox, my secretary who handles part-time work for the students has done an excellent piece of work in finding part-time jobs to help the students who are pressed financially. It is quite difficult to give an exact number of the students who dropped out of college for financial reasons. Practically all students who drop out for any reason at all adds " and I have financial trouble". I believe we would be safe in saying that not more than twelve to fifteen students dropped out during the year for actual financial necessity.

I would also like to commend Mrs. Maddox, my secretary for the very fine work that she has done with placement. She has set up complete files with recommendations and complete records on all members of the graduating class and has been able to supply these to prospective employers. She has likewise arranged for interviews with our graduates by International

Business Machines Corp.; Citizens & Southern National Bank; various insurance companies; The Internal Revenue Service and a number of other prospective employers. She has provided a most satisfactory placement service for our graduates.

CURRICULA

We have not added any new programs to our offerings this year, nor have we discontinued any programs carried in our catalog. So in the field of curriculum, our offerings are about the same as last year.

LIBRARY

Our library meets the standards of the Southern Association. The administration of the college has increased as much as we could our support for the library. We have added a full-time secretary to the library who will do secretarial work as well as waiting on students at the counter, will do cataloguing and other work assigned to her by the Librarian. If our enrollment continues to increase, we will, however, have to make a substantial increase to the library to keep within the limits of the Southern Association. At this point I would like to quote from the annual report of Miss Patterson, the Librarian, as this will give you a clearer picture of the activities of the library than I could give by editing her report:

"Comparing statistics with those for the past three years, it would seem that this was a very normal year. To the librarians, it has been a very busy one. The student assistants have been cooperative and dependable.

At present, we subscribe to 221 periodicals, receive 35 through the U. S. Government Depository Library and 85 others as gifts, making a total of 341. We subscribe to 12 newspapers and receive 3 as gifts.

In 1959-60, we bound 166 volumes; in 1960-61, we bound 194 volumes.

The increase in the number of books and periodicals purchased and the number of periodicals bound was made possible by an increase in the library budget. However, due to increase in cost of books, periodicals, binding, and transportation, it did not go as far as we had hoped.

The number of lost and mutilated books and periodicals is alarming. Most of these disappear without being checked out. Far too much of the library budget must go to replace these losses, especially the periodicals and reference books. The distressing thing is that often the items cannot be replaced at any price. Inventory this year showed 5 volumes of bound periodicals, 3 volumes from different sets of encyclopedias as well as a few other valuable reference books had disappeared. There was a 28 percent increase in loss of books and periodicals over 1958-59. I am comparing the loss with 1958-59 because 1959-60 was the total loss for two years.

There is an increase in library use as indicated by average daily attendance as well as daily circulation. There is a 28 percent increase in circulation of unbound periodicals as well as an increase in use in the library. Reserve use has increased also.

Both librarians are members of the American Library Association, the Southeastern Library Association, the Georgia Library Association, and the Georgia Education Association.

We appreciate the increase in the Library budget which approaches the requested \$40. per student enrolled. If the allotment continues to increase at the same rate as the enrollment, we should be able to take care of recurring items to meet minimum standards."

CIRCULATION AND BOOK STOCK

Comparative figures: 1958-59; 1959-60; 1960-61

CIRCULATION	1958-59	1959-60	1960-61

*Includes loss for 2 years.

RESEARCH

Since Valdosta State College is an undergraduate four year institution, we do not have an organized program of research. I mentioned in my annual report last year that the people holding doctor's degrees that we are adding to our faculty as we can, have all ask us about reducing their teaching load, so that they may continue their research. I think that this is a problem that we are going to have to face in the very near future, if we wish to hold competent doctors that we have on our faculty. Professor Maurice Lindauer, whom I have mentioned earlier in this report, is a very competent research worker, and during the summer of 1961 did research at the University of Tennessee and will publish two papers, based on the research that he did at the University in the field of radio active isotopes. Dr. Clyde Connell of our Biology Department has worked again for the University of Georgia this summer doing research in ecology. Dr. Marjorie Carter and Dr. Beatrice Nevins, both of our Biology Department, are also interested in continuing their research. I feel sure that other holders of the doctorate on our faculty would like to continue doing research as time goes on, if we can reduce their teaching load somewhat.

This brings us to another question which is asked of us very frequently these days. That question is, " when will we have a graduate program at Valdosta State College? " I have not pushed this question in the past because I have not felt that we were prepared to give graduate work. As we go on strengthening our faculty in adding more doctors, we will, before too long, come to the point where we must face this question. Also, there are many people in this area who would like to do graduate work but who cannot go to the University to do it. I merely mention this as one question which will come up in the near future.

PUBLIC SERVICES

All of our faculty members participate actively in civic affairs in our community. Without many exceptions, all are active in their various churches. Dr. J. A. Durrenberger, the Dean is on the State Board of the Y. M. C. A.; the President of the college serves on the city Board of Education and all of our staff members are called upon from time to time to serve as consultants in the field of Education for the school systems throughout South Georgia.

In these days in which Science is stressed so much, Science Fairs are held in schools throughout the State. Our Science teachers here at the college are in constant demand to serve as judges in these various Science Fairs.

We did not hold any short courses or institutes during the past year. We do hold on our campus in the spring the annual meeting of the Future Teachers of America for the Southern portion of the State. This is a program that has for its purpose, encouraging young people to go into the teaching profession. We have sponsored this because it is a good device for getting students into our Education programs. Many students who attend this conference do come to college with us, although they may not follow the program in Teacher Education, but we feel that it is definitely worthwhile in encouraging young people to go on for more education on the college level.

Our Educational Clinic, which has been part of the Department of Education, in addition to working with our own students, has from time to time made tests on children not in the student body and Mrs. Hutchinson who has handled that work for the past three years has done very valuable work in diagnosing speech difficulties for the children of this area, and directing them to sources that may help them improve in this handicap.

Mrs. Nadine O'Steen who works with our staff, although she is paid by the State Department of Education renders a great service to the schools in this area. She is a field agent working out of our campus, helping the schools in South Georgia with their various problems. This has been a very valuable service that we have been able to render to the schools in this area. We are very pleased that the majority of our staff are civic minded people and who do not limit their activities to the small number of hours a week that they teach in the classroom. They are constantly available to help the citizens of South Georgia with their various problems.

GIFTS

Earlier in this report I mentioned an advanced course in Chemistry, dealing with the techniques of radio active isotopes. We had been given a grant last year by the Atomic Energy Commission which enabled us to purchase the necessary laboratory equipment for this project. The Atomic Energy Commission was so pleased with the report made of this project that we were given an additional grant in June, 1961 of \$2,249.00 to add additional equipment for experimental work in the field of Atomic Energy and radioisotopes. We were very grateful to the Atomic Energy Commission for this additional grant which will enable our Physics and Chemistry Departments to expand somewhat their training in the various Chemistry and Physics courses in the field of radioisotopes.

Again this year the Lowndes County Chamber of Commerce continued its scholarship program, and we were given \$4,446.00 to be used as gift scholarships, paying the fees for capable students who could not otherwise attend college. This grant of money, provided by members of the Chamber of Commerce enabled 28 worthy young men and women to attend college with us this year. We had seven additional scholarships this year in the amount of

\$888.00. One was provided by the Lee Street Baptist Church; two by the Valdosta Junior Chamber of Commerce; one by the Alspaha Soil Conservation District; three by the Rotary Club of Valdosta and one by the Berrien County School System. These scholarship grants made it possible for a group of young people to pursue their college work who could not have otherwise done so. These grants, however, did not cover the number of requests that we had for scholarship aid. We had at least thirty additional applicants who needed help, but the aid was given to those with the better records. We hope that the scholarship aid will increase as we go into a new year.

NEW CONSTRUCTION AND REPAIRS

During the past year we had one major piece of construction completed. This was the Annex to West Hall, costing \$261,901.30. This three-story annex, providing satisfactory laboratory and classroom facilities for the Physics Department; office space for the Dean of Men and the Academic Dean as well as offices for the Business Administration Department and the English Department, with eight additional classrooms will take the pressure off of us for a year or so as far as general classrooms are concerned. During the year we expended \$13,723.30 for Educational Equipment such as classroom tables and chairs, accounting machine, typewriters and duplicators for use in the programs in Business Administration.

After many years we paved the parking places on Main Campus and some of the unpaved roads in the sum of \$14,911.37. At last we got the North Campus out of the mud, paving the roads on that campus and considerable parking areas in the amount of \$17,730.00.

We installed fluorescent lights in Pound Hall on the North Campus, costing \$4,782.75.

We have also been installing vinyl tile on the floors of the Administration Building, Ashley Hall and Converse Hall. This project is costing \$27,085.53. These items amount to \$340,134.25. Of this amount the college transferred from Educational and General Surplus \$47,896.91 and from the Auxiliary Enterprise account the sum of \$16,000.00. The total transfer from our surplus funds for these projects this year has been \$63,896.91.

In addition to these special items, in our normal maintenance program, we have painted the President's home; the interior of Converse Hall; the interior and window frames of the Dining Hall; the Student Center and the Gymnasium. This of course is in our regular annual maintenance program. A great deal of that work was done by our own labor and I am not quoting any figure as to the cost on this, but I did want to mention that in our normal procedures we tried to paint and keep in fine shape each year, several of our buildings.

CONCLUSION

We have had a very satisfactory year at Valdosta State College and the members of the faculty and staff have cooperated in a very fine way. We have a very fine faculty and are providing quality education for the young people in this area who might not otherwise receive college training. I would like to point out also that we are providing services for the schools in this area and by our training programs in Teacher Education for the in-service teachers we are helping in raising the standard of teaching in the schools in our area.

For the past year or so we have been terribly crowded for classroom and office space. The opening of West Hall Annex in May has helped solve this problem to a great extent. With the additional classrooms and

the addition of one person to our Modern Language Department, the two people comprising that department will not be able to carry the load of work that will be demanded of them this fall. We are installing this summer a Language Laboratory with twenty individual stations, and we have already outgrown this laboratory before we have moved into it. It has been wired for thirty stations and we should look forward to adding these ten additional individual stations just as soon as it is possible for us to finance this, so that we may do the excellent job that is possible with the two outstanding teachers that we have added to that department.

We have looked forward for a number of years to the addition of a new infirmary to our facilities. This dream is about to become a reality, as bids were opened about two weeks ago and the contractor is in Valdosta now, ready to begin construction on that building. This will free room for approximately twenty additional girls in Converse Hall and will give us fine facilities for the use of Dr. Stump and his assistant in caring for the health of our student body. We are indeed pleased that this dream of long years is about to become a reality.

The increase in enrollment will give us a problem next year in financial support for the Library. When budget time comes around again, it will be necessary for us to consider most carefully a substantial increase to our Library to keep the support in line with the requirements of the Southern Association.

In closing this report I would like to express my appreciation to the other members of the Administrative Staff and to the Faculty for their excellent cooperation during the past year. I would also like to take this opportunity to express to you and to the Staff of the Office of the Board of Regents our appreciation of the support that has been given us during the year.

The aid and assistance given us by your office and the friendly encouragement that we have had from all members of your staff has made possible for us a very successful year at Valdosta State College. We have added a number of very fine staff members for next year and we are looking forward to the best year in the history of the college as we go into the new year in September.

Respectfully submitted,

J. Ralph Thaxton
President
