

ERRATUM

Figure 1 of the paper by Trolard *et al.* (p. 324 of the June 2007 issue) should have been printed in color.

Figure 1. Type locality at Fougères: soil profile with blue-green Gr horizon containing fougérite. At the surface, litter made of beech leaves, overlying an organo-mineral horizon (0–15 cm) and the horizon showing gleyic, specifically reductomorphic properties Gr (15–30 cm). The groundwater table can be seen at the bottom of the profile.
