Primo Deduplication Report

Julie Dyles updated on the Primo Deduplication investigation and report.

75% (from survey) wanted to try changes in the sandbox; not waiting for further input from committee.
Change is to match on oclc #.

Set NZ records to ignore CZ records has been activated.

Updates on NZ support:

NZ Coordinator has been funded for FY 2018.

USG is providing 50% of cost

UGA is providing 50% of cost

USG will provide 100% funding for FY 2019.

Working Group will be formed of GIL support, USG Cataloging Team members, and ExLibris to work on higher level decisions and liason with USG Cataloging Team.

Bill Clayton led discussion of document, ExLibris Response: Cataloger Level and Brief Records

Bill discussed the brief records and ExLibris' comments regarding our questions on cataloging levels and brief records

- Yes, can prevent overlay of full record by brief
- can run jobs (isolate records)

Cataloging levels

- July fix in place> will not reset to cataloging level 00 after upgrades
- July fix does not solve issue of a brief catalog record (00) replaced by full record
- Recording rules and levels (#6) GIL support is investigating
- Bill will setup a meeting with catalogers, GIL Support, and Exlibris

Sean shared ORBIS brief record level configuration.

<https://www.orbiscascade.org/alma-brief-record-level-configuration>

Multimatches

Will match against \$a per Cataloging group vote. Sean P. and Bill C. will get together to take a look at the multimatch options \$a and/or \$z. It will NOT do cleanup but it will prevent some records from being thrown into IZ, because they match multiple records.

Sean will send the emails he has received through the report an error mailbox to galileo.libanswers.com

Discussion of questions related to update/sync schedule and regularity of updates. Sean will add info to the training wiki about updates. No delays in Primo updates have been reported thus far.

Reminder: Next meeting 7/27/2017, Shelley Rogers will take minutes.
