Volume XXVII

Valdosta State College, Valdosta, Georgia, Wednesday, Nov. 8, 1961

Number 3

Winners in the recent elections meet with SGA President Billy McDaniels (seated). Left to right, are: Maryzell Smith, Treasurer of the Freshman Class; Peggy Elliot, Frosh Secretary; Larry Rogers, Frosh Vice-President; Freshman President, Laurice Coan, Bucky Bowles, Sophomore President; Carol Greene, Freshman SGA Representative; Frank Cameron, Dorm SGA Representative. Not shown are Bobby Speck, Freshman SGA Representative, and Doug Jones, Sophomore Vice-President. - Times Photo.

## Dr. T. H. Moreton Speaks At Assembly

By Louis Sheffield

A missionary on leave from his duties in Japan told the student body that he was proud to be a bridge between the United States and Japan. Dr. T. Hugh Moreton, who is serving as pastor of the Navy Baptist Church during his nine-month furlough, spoke at the October 25 assembly program about Japanese-American relationships.

Dr. Moreton stated that not enough attention is given to the fact that the United States, the strongest force against Japan in World War II, has now become a benefactor. He suggested that if the United States would exercise such economic policies as would help Japan improve her economic position, that that nation would be the means of creating goodwill for America in Africa and Asia.

The speaker advocated low tariffs on Japanese textiles, with government subsidies going to American textile companies so that they could survive against their foreign competition.

He emphasized that the riots that caused the cancellation of President Eisenhower's visit to Japan were not against the United States, but against the Japanese in power. Actually, Japanese respect this nation. More goodwill was created when President Kennedy appointed a man with a Japanese wife as ambassador to Japan.

Dr. Moreton concluded his talk by asking the students to try to emphasize the good that is done in the United States. By being

## Free Study Abroad Is Up

The latest edition of Unesco's STUDY ABROAD is greatly expanded and lists more than 115,000 individual opportunities for free travel and study in 115 countries.

These scholarships and fellowships are offered by a total of

## Air Force Major Assembly Speaker

By Louis Sheffield

Major John E. Cottongim, a 1961 graduate of the U. S. A. Command and Staff College, will be the guest speaker at the assembly program on Wednesday, November 8. Major Cottongim will discuss the subject, "Air Force in the Space Age".

A native of East Point, Georgia, Major Cottongim entered service in 1943. He was graduated in 1947 from the U. S. Military Academy. He is presently assigned to Andrews AFB, Maryland.

The Major speaks Japanese fluently and is a member of the Japanese-American Society.

1,750 private institutions, governments, inter-governmental and international organizations, including for the first time, the International Atomic Energy Agency, the British Commonwealth Scholarship and Fellowship Plan and the University of Friendship Among Nations in Moscow. They are in all fields of study and research. More than twice as many opportunities are available to American students than to those of any other country.

Full information on eligibility, duration, value and application procedures is given for each award. Also, there is a list of 300 organizations throughout the world that provide advice and practical help to foreign students and to their nationals wishing to study abroad.

Available at \$3.25, including postage, from International Publications Service, 18 East 33rd Street, New York 16, N. Y., the latest edition of this comprehensive international handbook is especially arranged to facilitate easy use.

## Coan-Bowles Lead Junior College

Laurice Coan has been chosen to head the largest Freshman class in the history of VSC, in an election sponsored by the Student Government Association on Oct. 25.

Vice president is Larry Rogers, Peggy Elliot is secretary and Maryzell Smith is treasurer.

All of these students are graduates of Valdosta High School, Carol Greene, of Tifton, is the

girls' representative to the SGA. In the race for boys' SGA representative, the first balloting resulted in a tie. In a run-off on the following day, Bobby Speck, of Americus, won the post.

In the race for the sophomore offices, Bucky Bowles was elected president, filling the vacancy left by Ike Boyette, who is not attending VSC this year.

## Sock'n Buskin Club To Present "Bus Stop"

By Angelyn Webb

The Sock 'n Buskin Club will present Bus Stop, a three-act romance, by William Inge in Pound Hall on Nov. 16 and 17, 1961.

The cast includes Sandra Phillips as Elma Duckworth, a waitress; Carol Deen as Grace Hoyland, the restaurant owner; Phillip Barr as Will Masters, a sheriff; Gail

Thomas as Cherie, a chanteuse; Freddy Lawrence as Carl, a bus driver; Grady Mills as Dr. Gerald Lyman, a former college professor; George Hubert as Virgil Blessing, a ranch hand; and Micky Short as Bo Decker, a young rancher and cowboy.

The story is a warm and sensible little overnight scrap between a couple of stranded, stubborn, appealing people. A bus out of Kansas City pulls up at a cheerful roadside diner in the middle of a howling snowstorm. All roads are blocked and four or five weary travelers are going to have to hold up until morning. Cherie, is the passenger with most to worry about. She's been pursued, made love to, and finally kidnapped by a 21-year old cowboy with a ranch of his own and the romantic methods of an unusually headstrong bull. These two beautifully

matched but cantankerous knuckleheads proceed to swap insults, blows, and nervous confessions. As a background to the romance, the proprietor of the cafe and the bus driver at last find time to develop a friendship of their own, a middleaged scholar comes to face himself, and a young girl who works in the cafe gets her first hint of romance.

The production staff will be composed of students taking Speech 300.

Curtain time will be 8:15. Admission will be \$.50 and \$1.

## Greek Week Starts Thurs

By Bill Thaxton

VSC fraternities and sororities are preparing for "Greek Week". All the Greeks on the campus participate in events which last from November 9 through November 12.

On Friday night, November 10, at 7 p. m., skits will be presented in the auditorium in Pound Hall on the North Campus, and immediately afterwards there will be a song fest. After these two events, an informal dance will be held in the Student Center.

The athletic events will begin at 2 p. m. on Saturday, November 11. All Greeks will form a circle and try to catch a greased pig. Everybody get out your bicycles and tune them up, because there is going to be a bicycle race. This race will begin at Five Points on the northside of Valdosta, run south on Patterson Street, and end at the campus.

There will also be the broad jump, the high jump, shot put, 100 yard dash, javelin throw and relay races. Because plans are still being made, this list is not yet complete.

At 8 p. m. Saturday a Greek dance will be held and the Greek God and Goddess will be crowned. The place where this dance is to be held has not yet been decided upon.

To end Greek Week, church services will be in the auditorium in Pound Hall on the North Campus. The choir will be composed of 18 people, three from each sorority and fraternity. May the best man win.

## Calendar Girl Contest Tonight

Tau Kappa Epsilon will present its annual Calendar Girl Contest tonight at 8 p. m. in the VSC gym. The theme of this year's contest is "Gay Paree". Ted Clark of WVL Radio will be master of ceremonies.

The contestants will be: Judy King, Jessylin Garbutt, Ethel Tyson, Bud Goggins, Dianne Ruth, Snookie Rigdon and Anne Johns of Alpha Delta Pi; Nancy Hart, Marylou Minchew, Brenda Houston, Jane McRae, Gene Kiff, Sue Maxwell, Dee Robinson of Alpha Xi Delta; Jo Ann Atkinson, Susan Branch, Suzanne Brown, Betty Jo Greene, Betty Don Majors, Gail Brown, and Emily Shaw of Kappa Delta; and Independents Sue Hobbs, Susan Hutchenson, Amy Hornsby, Janice Ruis, Helen Black, Carol Greene, Sunny Gornto, Rosann Taylor and Judy Butler.

Reports are that interest in the contest is running high among Valdosta's businessmen. Many of the girls' sponsors are giving them gifts.

Gary Smith is in charge of the contest.

Chosen to represent the boys' dorm in the SGA was Frank Cameron, of Lithonia, Ga.

# EDITORIALS

By Emily Leonard

A tree with roots near the surface will topple at the slightest hint of wind. A house with shallow foundations won't endure.

The higher the tree and building, the deeper the foundations must be. You are able to see the height, but the lowliness is hidden. If the roots weren't this lowly, the tree couldn't be so lofty.

Therefore, dig a deep foundation of humility, so that the heights hoped for may be reached.

One thing that college often fails to teach is a deep sense of humility. Life alone is the teacher, and the lesson is long and hard.

The difference is great between the humble and boastful. Each has outward and inward feelings. The outer would be nothing if the inner didn't surrender. Fear of opinion, humility, graciousness, timidity--all are inward qualities, be they good or bad, that will be nourished or killed by the outward environment.

But whatever that environment holds, there is room for humility.

A cartoon appeared in a New York paper. A young woman in her graduation cap and gown had just received her college diploma with a lot of self satisfaction. The old world was standing by the girl and asked her, "Well, who have we here?"

The girl replied, "You evidently don't know me. I am Virginia Cordelia Smith, A. B."

"My dear girl", said the world, "Come with me and I will teach you the rest of your alphabet".

By Karen Clary

Someone once classified people as follows: those who make things happen, those who only sit back and observe what is happening, and those who have no idea of what is happening. In our society, too vast a majority appears in the latter group.

Those who take it upon themselves to induce the occurrence of events should be commended. Few have the initiative to accept this responsibility. These people

also receive self-satisfaction for their perseverance in leadership and in being informed.

The second group, the observers, are only informed. To often, however, it happens that the observers are also the cynics. An observer is helpful as a cynic only if he is willing to aid in the correction of the fallacy responsible for his cynicism.

The last group owe their innocence to indolence or carelessness. Because of their unconcern, these people may one day feel that life has passed them by. However, one must thrust himself forward if he expects to feel a part of life, rather than an outsider.

True, everyone cannot be a leader. On the other hand, all can be staunch followers and can aid in the elimination of the unconcern of some people with life.

## AN UNJUST REQUIREMENT

Valdosta State College has several outstanding clubs on campus. The organizations are important to student life, not only for social gatherings but for additional education in a chosen profession.

Most of these clubs have a membership made up of students who are interested in the club, who went to help it and themselves. However, two of these clubs are being handicapped by members who have no desire to participate, but attend because they are required to. The Education Department requires membership in the Education Club; the Business Administration Department compels its majors to attend Phi Beta Lambda meetings. This causes hardships for both the clubs and students.

The clubs suffer because their memberships include many who care nothing for the organization. A club functions best when all members cooperate in all activities. "Dead wood" has never contributed to success.

The student suffers because of the extra time and expense re-

quired. Many VSC students work; they need to spend all available time with their studies. When clubs meet the night before a big test, either grades or activities must be sacrificed. Required club participation leaves no alternative. The grades must suffer! The student body is made up of many day students. Some of these are business or education majors who live quite a distance from the campus--as much as 45 miles. It is hardly practical to require these persons to give up three hours for the meeting and the round trip. Of course, the expense of this special journey is to be considered.

It is admitted that all education majors should belong to the Education Club and all business majors should belong to Phi Beta Lambda. However, the American principles of freedom leave to the individual the right to make the decision.

Extra-curricula activities are good; they are important; they are necessary--but they should not be required! The Education and Business Administration Departments are wrong to require their students to be members of these clubs.

We always hear that those comedians up in Washington are trying to figure out a way to save the taxpayers money; at least what's what they tell us about re-election time. Here's a good way we might reduce some of the immense expense of the United States Government. Why don't we stop making federal and state employees pay taxes. Now don't get all worked up. We can reduce the amount of taxes they pay by the amount of raise they usually get in salary. Their raise comes in reduced taxes, until they have no more tax to pay; then their salary is increased with actual cash again. This principle is so easy to follow that some of our own representatives might try it out in the form of a bill, or whatever they're passing up that way.

There just isn't any sense in the government paying a person and then demanding part of the money back. Why not pay the person one time and get all that complicated bookwork over with. Just think of the scores of paper, ink, and bookkeepers that could be eliminated from the Treasury Department; to say nothing of the relief of our poor civil servant who is more than likely confused by all the forms the Bureau of Internal Revenue has sent him. Fellows can get downright nasty when you make mistakes in your favor.

When you work for the government you usually get a raise in pay each year for six years, or your classification moves up. Either way you are being paid more money. Why not let the increased salary be in reduced taxes, until there isn't any more tax to be paid. This would result in happier government employees, savings in the government, and less taxes to be paid by us, the people. This is a way to reduce taxes. Can you think of another?

# Letters to the Editor

Editor:

I would like to voice a protest against the type of movies shown in our local theaters on week-ends. It seems to me the better movies are always shown early in the week when teenagers are supposed to be studying. On week-ends, when we could really enjoy a good show, the only choices we have are between second-rate western pictures and horror movies.

Is there anything we as college students can do to try to get some of the better movies booked for a week-end showing once in a while?

Avie Sue Hagan.

## "YOU ALWAYS HURT THE ONE YOU LOVE"

By Roz Sprayberry

"You always hurt the one you love." How true that statement is. Many times, you may do or say things on the spur of the moment, not actually realizing how much it hurts the person to whom you are saying it. Most of the time, that person is usually someone you love very much.

You may ask yourself, "why did I say that or why did I do that?" This question is not easily answered. There could be many reasons for hurting someone very dear to you. One could be jealousy, and another could be pure selfishness.

Webster defines jealousy as the demand for exclusive affection or attention, and sometimes a person can demand too much from another; this leads to selfishness, caring only for one's own desires or needs. True love should be excluded of both of these. But it very seldom is.

Quite often when you hurt someone with a hasty remark, you are actually hurting yourself. You may not think so at first, but later you will realize your mistake--after it is too late.

Stop and think, the next time you start to say something uncalled for--things can't always go the way you want them to, and you may hurt someone you love very much.

Remember, "You always hurt the one you love; the one you shouldn't hurt at all."

## Dr. T.H. Moreton

(Continued from Page 1)

partners with Japan and other nations the chances of a free world would be enhanced.

A naturalized American citizen, Dr. Moreton was born in Shanghai, China, and is the son of an Englishman and a Japanese woman. He is married to a native Georgian.

Dr. Moreton holds degrees in three fields--law, theology and medicine. He attended universities in Glasgow, Scotland and Oxford, England.

In 1951, he and his wife went as missionaries to Tokyo, Japan, where he founded the House of Hope Orphanage. When he returns to Japan, Dr. Moreton will resume the direction of this work.

Editor:

This is to voice my complaint about all the unnecessary noise about Converse Hall during quiet hours.

We, the Freshmen, aren't much to blame at times as some of the upperclassmen monitor. Since these monitors are being paid, they should at least exert themselves enough to go to the girls' rooms and get them quiet, rather than yell and down the halls to them. As hearing "Go to your room", "Girls, get quiet"; "Turn down those radios"; being hollered down the halls, believe me, I am about ready to give up studying, to give these monitors a reason to holler. A monitor should try studying in our room and see how much she gets done.

In closing, I wish to make an urgent plea to all monitors: Please tone down those vocal chords, that we can bring our C's up to B's.

Name Withheld.

Editor: The condition of the world today clearly calls for a better understanding between countries. I firmly believe that the Foreign Student Exchange Plan will be to obtain this understanding.

This program enables qualified young people to learn the customs and feelings of other nationalities while furthering their education. These students will be the leaders of tomorrow, and their experience is certain to be of help to them in making decisions. Surely peace will come with understanding.

VSC is very fortunate to have a group of these exchange students enrolled here. I hope that everyone will help to make these students feel at home and to give them a good impression.

Glenda Stone.

Editor:

On our campus I have noticed a trait of our students which is growing more prevalent each day. This habit is that several students gather in a group and stick together constantly. These little cliques are so absorbed in their problems and enjoyment that they do not speak to anyone.

This habit has made many students feel left out. It also gives room for talk of unfriendliness on our campus.

I urge that this problem be brought to the attention of the students do that some correction can be made on their part.

Name withheld.

Editor:

I want to ask a question that has been in my mind for some time. How does one get on the newspaper staff at VSC? This has been asked by our fellow freshmen, and I am sure that they, as well as I, would appreciate it very much if some public announcement would be made to the effect of the time, way and place to apply for a position on the newspaper staff.

Kermit Hinnicutt. Editor - Anyone interested in working on the Campus Canopy is welcome. The time and place of meetings is posted on the bulletin board in the Administration building before each meeting.

# Campus Personalities

The Campus Canopy has chosen Robert Bailey, a well-known rampaging Rebel and short'n sweet Jeanie Posey as the featured campus personalities for this edition.

Jeanie, a senior elementary education major, hails from Cairo, Georgia. She is president of Alpha Delta Pi sorority and the senior representative to the S.C.A. Other activities include the Education Club, Sigma Phi Epsilon sponsor and 1st vice-president of the WRHC court. This past summer Jeanie attended the Alpha Delta Pi National Convention in Los Angeles, California. On her return trip, she spent ten days in Las Vegas with rela-

tives.

Robert, from Vienna, Georgia, is majoring in business administration. He transferred from Spartanburg Junior College, where he played basketball, baseball, and tennis, to VSC on a basketball scholarship. Robert also plays baseball and is a member of the Future Business Leaders of America. Robert's likes include "any kind of food that's sweet" and "friendly and unaffected people."

Jeanie can often be found taking cat naps in her room between studying and attending all her many extra-curricular activities. Robert is usually seen heading for the gym and basketball practice.

## SOCIETY

BY SHARON BOATWRIGHT

By Sharon Boatwright

Rush was certainly a busy time for all concerned and has been followed up by a number of parties in honor of the new pledges. Alpha Xi Delta's pledges have been honored at two parties, one following the Pledging ceremony and one following the Mother-Daughter Ceremony. Plans are also being made for the annual Mother's Tea.

Alpha Delta Pi and Kappa Delta also recognized their new pledges at parties following the ribboning ceremony. They have officially pledged their girls. Alpha Delta Pi will be sponsoring a

spaghetti supper, the date of which will be announced later.

K. D. Kaye Dimingos is wearing a lovely engagement ring. Congratulations, Kaye.

Sigma Phi Epsilon entertained brothers, pledges, and their dates with a party at Twin Lakes on October 21.

Tau Kappa Epsilon got off to a good start this year by serenading the sorority girls. The girls enjoyed this very much.

Pi Kappa Phi is proud to have Mr. Brown here at VSC. Pi Kappa Ashley Register seems to be getting a large charge from Mr. Gabbard's engagement. Why, Ashley?

ANYONE INTERESTED IN WORKING ON THE CAMPUS CANOPY PLEASE CONTACT HUGH McINTYRE OR COME TO STAFF MEETING TIMES ARE POSTED ON FLASH BOARD IN AD BUILDING

# NSF Announces Graduate Fellowships

ANNOUNCEMENT OF THE NATIONAL SCIENCE FOUNDATION GRADUATE FELLOWSHIPS FOR ACADEMIC YEAR 1962-1963

AS ONE means of promoting the progress of science, the National Science Foundation plans to award approximately 2,500 graduate fellowships in science for the 1962-1963 academic year. These will be apportioned between the Foundation's "Graduate" and its "Cooperative Graduate" fellowship programs in such a manner that individuals of comparable ability receive awards in each of the programs. This announcement describes GRADUATE FELLOWSHIPS only; the companion Cooperative Graduate Fellowships are explained in a separate brochure. The two programs differ somewhat in financial arrangements.

Awards of National Science Foundation Graduate Fellowships will be made for study or work in the mathematical, physical, medical, biological and engineering sciences, anthropology, economics (excluding business administration), geography, the history and philosophy of science, psychology (excluding clinical psychology), and sociology (not including social work). Also included are interdisciplinary areas which are comprised of overlapping fields among two or more sciences (for example, geochemistry, meteorology and oceanography). The fields of research and study covered by these awards are limited to those which conform to accepted standards of scientific inquiry by fulfilling the requirements of the basic scientific method as to objectivity, verifiability and generality.

Awards are not made to individuals for study in a program leading to the M.D. degree nor for a course of study designed to prepare them for careers in medical practice or other clinical fields; however, applications will be accepted from those who intend to obtain advanced training in one of the medical sciences directed toward a career in research or teaching.

### Eligibility

National Science Foundation Graduate Fellowships will be awarded on the basis of ability, in accordance with Section 10 of the National Science Foundation Act of 1950, as amended, only to persons who (a) are citizens or nationals of the United States (or will be by March 1, 1962), (b) have demonstrated ability and special aptitude for advanced training in the sciences, and (c)

have been admitted to graduate status by the institution they select or will have been so admitted prior to beginning their fellowship tenures. Awards will be made to individuals studying for either masters' or doctoral degrees under one of the following levels:

**First Year Fellowships:** Awards in this category will be made to students entering graduate school for the first time or those who will have completed less than one normal year of graduate study, as of the beginning of the tenure of their fellowships. *College seniors who expect to receive a baccalaureate degree during the 1961-1962 academic year and other individuals who can produce evidence that they are acceptable as regular graduate students in an accredited nonprofit institution of higher learning are eligible for such first year fellowships.*

**Intermediate Fellowships:** Awards in this category will be made to students who will have completed, as of the beginning of their fellowships, an amount of graduate training considered by the institutions at which they are in attendance to be a normal year of graduate study, but who will require more than one additional year to complete the requirements for a doctoral degree.

**Terminal Year Fellowships:** Awards in this category will be made to students who expect to complete the requirements for a doctoral degree within one calendar year from the date on which they begin the tenure of their fellowships.

### Fellowship Activities

A National Science Foundation Graduate Fellow will be required to spend full time on advanced scientific study or work during the period of his award, including such teaching as is in the institution's opinion contributory to his academic progress. A Fellow may therefore be permitted to engage in a limited amount of teaching without having to obtain the Foundation's approval. However, except as provided under "Stipends and Allowances," a Fellow may not receive additional remuneration from another fellowship, assistantship, scholarship or similar award or Federal grant or contract during his tenure. The results of research carried out by a Fellow may be made available to the public by ordinary means without restriction except as is required in the interest of national security.

### Application and Award Dates

Applications for Graduate Fellowships must be received in the Fellowship Office

(Continued on Page 4)

## VEA Presents Singer Yeend

Miss Frances Yeend, soprano with the Metropolitan Opera Company, will appear in concert Nov. 2, 8:15 p.m., at the Ritz theater. This is the first in the Valdost Entertainment Association's second series of attractions.

Miss Yeend has had wide experience with several opera companies before joining the Metropolitan. She has sung under the direction of some of the most famous conductors, and with leading orchestras. Her program here will include an interesting selection of art songs, folk songs, and

six operatic arias.

Season tickets will be available thru the concert on Nov. 2. Prices for season tickets are \$5 unreserved, \$7, \$8.50 and \$10 reserved. Season tickets may be purchased at the door along with individual tickets for this concert which are \$3.

Other attractions are the Atlanta Symphony in January with individual tickets \$3, and the Broadway musical "The Music Man" in March for which individual tickets will be \$5.

## ASK AUNT CRABBY

Advice To The Lovelorn

Dear Aunt Crabby,

You simply must help me! I'm at my wit's end. It hurts to admit it, but I am a ping-pong widow! Would anyone ever believe it? Forgive me - enough of my foolish pride - now I'll get down to facts. Everytime I meet my own true love in the Student Center, he hurriedly ushers me to a table of my friends (girls), and hastily departs to the porch for you guessed it - a hot game of

ping-pong. It might not be so bad if there were other boys inside to talk to, but they're all playing ping-pong too!

"Desperate"

Dear "Desperate",

I can't see anything appealing about a man (?) who prefers ping-pong to girls, but if you really do want him back, start a hot little crap game under the table. If that doesn't bring him in, then bone up on your ping-pong and proceed to the porch.

Craftily,

Aunt Crabby.

Confidential to G. S.,

Forget about it.

To my avid readers,

Let me hear about your problems - don't be bashful!

# SPORTS Intramural Schedule

## Freshman Features

So that everyone can become more acquainted with the players on this year's basketball squad, we will feature them according to their class.

The feature of this edition will be the freshmen.

Angie DeVivo, whom many of us may be familiar with for playing on the Rebels baseball squad last year, hails from New London, Connecticut. He is 5'10" tall and plays the position of guard.

Preston Hodges hails from Savannah, Georgia where he attended Groves High School. During his senior year in high school, Preston averaged 13 points per game. With his height and rebounding ability, he will be much help to the Rebels.

Last but not least is Bobby Speck, a 5'6" guard from Americus, Georgia. Bobby is on a baseball scholarship but is also trying his hand at basketball.

Intramurals in flag football have begun. Kick-off time is 4:15.

The schedule follows:  
NOV.

- 1 Phi Kapp vs Sig Epps
- 2 Town vs Dorm
- 6 T. K. E. vs Town
- 7 Dorm vs Sig Epps

- 8 Dorm vs Phi Kapps
- 9 T. K. E. vs Sig Epps
- 13 Sig Epps vs Town
- 14 T. K. E. vs Phi Kapps
- 15 T. K. E. vs Dorm
- 16 Town vs Phi Kapps
- 20 Phi Kapps vs Sig Epps
- 21 Town vs Dorm

- 22 T. K. E. vs Town
- 23 Dorm vs Sig Epps
- 27 Dorm vs Phi Kapps
- 28 T. K. E. vs Sig Epps
- 29 Sig Epps vs Town
- 30 T. K. E. vs Phi Kapps
- DEC.
- 4 T. K. E. vs Dorm
- 5 Town vs Phi Kapps

NSF ANNOUNCES GRADUATE FELLOWSHIPS (Continued from Page 3)  
of the National Academy of Sciences—National Research Council by January 5, 1962. Fellowships will be awarded by the National Science Foundation on March 15, 1962.

An Honorable Mention list containing the names of applicants for Graduate Fellowships considered worthy of support but to whom awards could not be made will also be distributed on that date.

ships are awarded for scientific study of scientific work at any appropriate nonprofit American or nonprofit foreign institution. An "appropriate institution" in this program is normally considered to be an institution of higher education. Fellowship recipients proposing study at foreign institutions must submit appropriate evidence that they have been accepted for study programs considered by these institutions to be at the graduate academic level in science.

The Foundation does not require that a Fellow be physically located at his institution at all times. Thus a Fellow may study or engage in research or field work elsewhere during part (in rare cases, during all) of his tenure if, in the judgment of the faculty of his fellowship institution, such a procedure will further the Fellow's education. Irrespective of his physical location the Fellow will be regarded by the Foundation as being affiliated with his fellowship institution and studying under the direction of its faculty.

Since the law requires the Foundation to select its Fellows solely on the basis of ability, an applicant's choice of graduate institution is not considered in any substantial way in the selection of fellowship recipients.

### Stipends and Allowances

Annual stipends for NSF Graduate Fellowships will vary with the category of award:

- The annual stipend for First Year Fellows will be \$1,800.
- The annual stipend for Intermediate Fellows will be \$2,000.
- The annual stipend for Terminal Year Fellows will be \$2,200.

The annual stipend will be made available to Fellows who elect the full year (12 months) option. Fellows electing an academic year (9 months) award will receive nine-twelfths of the annual stipend. Married Fellows normally will be provided a dependency allowance of an additional \$500 for each dependent child. As in the case of the stipend, these allowances will be reduced to nine-twelfths of the annual stipend for Fellows electing academic year awards. A limited allowance will be paid to aid in defraying the Fellow's cost of travel to his institution to enter on the tenure of his fellowship. The Fellow may accept up to but not in excess of—\$600 for a limited amount of teaching of an appropriate nature from his fellowship institution during a 9 to 12 month tenure. The institution is under no obligation to pay a Fellow for any teaching that is considered a requisite part of his graduate training. The National Science Foundation will pay all tuition and fees assessed and collected by the Fellow's fellowship institution from individuals of similar academic standing. In addition, a cost-of-education allowance of \$500 will be provided for the Fellow to United States institutions only.

It is the policy of the Foundation and the Veterans Administration that an individual may not receive funds for his training from the Foundation and from the Veterans Administration (under the Education of Korean Conflict Veterans Act or under Public Law 894, 81st Congress, as amended) concurrently.

### Applications

Individuals now in college or graduate school should find application materials for the National Science Foundation fellowships to be awarded in 1962 available through the Office of their President, Dean or Department Head; application forms used in earlier years or those used in other National Science Foundation fellowship programs should not be used. An applicant in this program must not have an application pending in the current operative Graduate Fellowship program at the same time. Application materials also be obtained from the Fellowship Office, National Academy of Sciences—National Research Council, 2101 Constitution Avenue, N.W., Washington 25, D. C.

## Sports Editorial

To many of you it may seem early to be talking about basketball, but since Valdosta State has no football team, all of our emphasis goes on basketball during this part of the season.

In the last few years the Rebels have made some good records with last year's performance topping them all. Valdosta State College entered the Georgia Inter-Collegiate Conference in 1957. The teams that made up this conference were: Piedmont, West Georgia, Shorter, LaGrange, Berry, North Georgia, Valdosta State and Oglethorpe. Oglethorpe dropped out last year leaving only seven teams in the conference. The Rebels won this conference last year by defeating all these

teams. Piedmont gave Valdosta State the best game.

The Rebel squad is lacking in height this year but with a lot of work, they will be a challenge to anyone. During the past week, they have been running through some new plays along with some which were very successful last year, such as the "wheel".

On the night of November 18, the Rebels will have their first game here on the home-court. Nothing could look better than to see the gym packed with spectators. Your support means much more than you realize to the Rebels, so come on out and give our school some "good ole college spirit."

### Selection

Selection of Fellows will be based on academic records, recommendations regarding each applicant's ability, scores achieved in examinations designed to test scientific aptitude and achievement, ability to carry out the proposed program in nine or twelve months of tenure and other evidence of potential ability for scientific study or work. Instructions concerning the required examination materials. The applicants must make the necessary arrangements by January 5, 1962.

Evaluation of each applicant's qualifications will be made by panels of scientists appointed by the National Academy of Sciences—National Research Council which assists the National Science Foundation in the evaluation of applicants. Final selection of Fellows will be made by the National Science Foundation.

All applicants will be notified by letter of the disposition of their applications on March 15, 1962.

### Conditions of Appointment

Each applicant must submit a signed application form, complete copies of transcripts of his college and university records, and a plan of study for advanced training or research. The duly executed affidavit and loyalty oath required by Section 16(d) of the National Science Foundation Act of 1950, as amended, [42 U.S.C. 1874(d)] must constitute part of the application.

### Tenure

Graduate Fellowships are awarded for continuous tenure periods to be selected by the Fellow to include either one regular academic year of two semesters (or three quarters) or a full year consisting of the regular academic year plus a full summer session (of at least two consecutive months). Fellows electing the longer tenure and studying at institutions where the summer session is divided into two terms will be expected to attend each of the terms during the tenure of their awards. Fellows electing full year tenures and attending institutions having no formal summer sessions must make special arrangements for supervised study or research at their institutions or other appropriate institutions. Graduate Fellows may enter on the tenure of their awards any time after June 1, 1962, but must begin their fellowship activities no later than the beginning of the 1962-1963 academic year at the institution of the Fellow's choice.

After an award is made for 9 or 12 months, a major change in course of study, tenure, or institution to be attended by a Fellow, requires prior approval of the National Science Foundation. It is expected that a Fellow shall carry out his program of study and/or research as proposed at the time of application. Major departures therefrom will be approved only for compelling reasons.

The granting of a fellowship implies no commitment about its renewal. Present Fellows will receive special instructions concerning the procedure to be followed in applying for a renewal of their current awards.

### Location of Work

In accordance with the provisions of the National Science Foundation Act, fellow-
