

Here is the topic where you should begin to upload the screencaptures of your use of the Logic App online. The link to use is <http://www.hatzicware.com/jLogic/>

Then do a snipping tool or snagit screencapture to save your work as a jpg, and upload it to a new thread/new post.

Take care!

Dr. James

PS - Just in case you receive a Java error when you go to the link above, go into Java settings and add in this url exactly to the "exceptions" list: exactly this link to the 'exceptions' list, and then restarted the browsers:

<http://www.hatzicware.com/jLogic/SLApplet.html>

Instructions for Java exceptions: http://java.com/en/download/help/jcp_security.xml

One other possible error is a Pop-Ups blocker, check the top right corner of your browser and be sure to Allow Pop-Ups from Hatzicware. Thank you!
