

Homework 10

Complete Part I first, by taking notes that you will keep for yourself. (*Do not turn these in.*) Type up your answer to Part II and submit it in one double-spaced, Word document. Add a title page with the title, your name, and the date. Use 12-point Times New Roman Font with 1” margins on all sides. When you are done upload this into the [Dropbox on Blazeview](#). If you are unable to use Word for the assignment, you may use another software package and upload a pdf instead.

PART I: Notes

1. Read and take notes on the video “Energy in Our Lives”.

PART II: Assignment (25 points total)

Choose one type of renewable or nonrenewable energy that relates to your major or chosen career field. In 3-5 pages (not including references and title page) describe the type of energy, how it is produced, why it is renewable or nonrenewable, and how it is used in or relates to your major or career field. You may not include pictures, but you may reference websites, when appropriate.
