We continued discussion of the minor in International Studies. A BlazeView shell was established so that committee members could list courses that they feel might be appropriate for inclusion as possible courses that could be taken for the minor. They would need to be open to any student across campus and have no prerequisites. We discussed being able to cross list the courses at the graduate level so that graduate students could also have access.

We also discussed virtual international experiences, various international experiences on campus and how these could fit into the minor.

The committee will work towards this goal of finding potential courses for the remainder of the semester.

Respectfully submitted by Brian Gerber
