

INDISPENSIBLE

If I should die,  
I don't know if they would know:

To dump the drain pan ~~beneath the refrig.~~  
beneath the refrig,

To water the Begonias  
every other week -  
preferably when dry -

To check the dog's  
shrinking collar,

To sniff up a rotten  
potato fallen through the  
hole in the hanging basket  
behind the fire extinguisher,

To check the pressure  
on the fire extinguisher!  
the smoke detectors for  
dying batteries!

Would they know the combination  
to the vacuum cleaner?  
Connect the hose from the Rainbow  
to the cannister of the Electrolux.

Would they know my system  
of filing bills?  
or dump it all and start over.

I think I'll post this on the refrig.  
Will they read it?
