Merry Christmas and a very happy new year to you, our valued customers. We hope that you will enjoy our 1996 calendar. It is hard to believe that we started in the printing business in 1962. Things have certainly changed in our industry with the biggest changes occurring in electronics. In 1962, we set our copy with hand selected type and a manual typewriter since there was no such thing as entering copy into a computer's memory. We can now send or receive electronic files by direct modem connection or from the Internet for the simplest business cards, letterheads or forms to the very intricate full-color brochures with photographs. Electronic files are sent to our imagesetter where negatives are produced ready for plating. What a BIG change in 34 years. We began with one new 11" x 17" press and a worn out 12" x 18" press. Compare that to the 15 presses we have now. We still have many 11" x 17" two-color presses, but our largest press is a Heidelberg Speedmaster which will print a sheet 28" x 40". This press will print 5 colors in one pass with excellent ink coverage, registration and speeds up to 12,000 impressions per hour. A color job in the past would have taken 3 to 4 days production time, whereas the same job today takes around 4 hours. If you are ever in our area, we would be very pleased to let you observe this fine piece of graphic equipment in operation and will even let you climb up on this press and watch it print. This truly awesome press prints beautiful full-color brochures, flyers, catalogs, advertising pieces, art prints and much more. The calendar that you are looking at was printed on our 40" Heidelberg in just 2 days. The art was chosen by our employees and produced totally in-house. Special thanks to all the artists who created such beautiful work. We wish there was a month for every artist who participated in the calendar contest. Many sincere thanks to you, our customers, for your printing business.

I hope you enjoy the calendar and have a prosperous 1996.

Sincerely,

Wally Colson

Production Notes

Printing

The 1996 Calendar was printed using 4-color process on a 40", 5-color Heidelberg Press.

Design

The calendar was created entirely on Macintosh computer systems. Art print images were merged into a page-layout program, combined with text and output to an AGFA AccuSet Imagesetter at 175-line screen.
